

## What is the USB

Honesty March 10<sup>th</sup> 2020

**Student's name:**.....

**Subject:** computer

**Grade:** 3 + 4

**Teacher's name:** Lubna Ghaith

**Flash memory/ (USB):** is a non-volatile memory chip used for storage and for transferring data between a personal computer (PC) and digital devices.

### How to download an image from Google and save it to USB:

- 1) GO to the Google program.
- 2) Type the name of the image and choose one.
- 3) Open the image then press right click mouse, choose save as and put it in the pictures file, click on the save.
- 4) Put the USB in its entrance.
- 5) Go to the pictures file, choose the image you uploaded then press right click in the picture and choose send to USB.

### How do I safely remove a USB device from my computer?

In Windows computers, there is a small icon in the bottom right corner of the task bar which, when clicked (once), shows a small menu.

Double-click on the USB and choose eject USB mass storage device then it will give you a message safe to remove hardware.
